

DIGITAL—User-Friendly!

Route any INPUT to any FADER...

OR EVEN ANY INPUT TO YOUR MONITORS! This console combines the benefits of a router and a console—all into one cost effective package. It's got everything you need: twelve faders plus two caller faders, four mic preamps and of course control room and studio monitoring, built-in cue and headphone amplifiers, and a concealed headphone jack.

It's got the high end features too, like bright LED dot matrix source displays above faders and monitor pots, and 24-bit A>D and D>A ins and outs. Its AES digital inputs have sample rate converters so it works with

virtually any digital source gear you have. It can run your source machines too—up to eight of them—all opto-isolated. It even has DSP digital metering that simultaneously displays VU columns and peak hold full scale digital so you can be assured of pristine performance. It has powerful caller tools that generate mix-minuses automatically, and you can program any of its four MXMs to be pre or post fader.

And because it's Auditronics, it's built tough as steel, and will be easy to maintain. *Digital CAN be easy—just call AUDITRONICS!*

Digital so easy you don't install it—you CONNECT it!
