VORSIS™ AP-1000 DIGITAL SPECTRAL PROCESSOR SELECTED FOR RADIO MAGAZINE NAB 2006 PICK HIT AWARD

LAS VEGAS (April 27, 2006)–The **Vorsis™ AP-1000 Digital Spectral Processor** manufactured by **Wheatstone Corporation** is the winner of *RADIO Magazine's NAB 2006 Pick Hit Award*, which is given by a panel of engineering judges and radio professionals. Each year fifteen such awards are presented to the products deemed to be most worthy of the highest technical honor.

The AP-1000 is one of the new additions to the Vorsis™ line of signal processors aimed at the Broadcast and Industrial Sound markets. The rack mountable, thirty-one band processor provides AM, FM, and HD spectral processing along with many customizable features including: three band preprocessing AGC, four band full parametric EQ, variable high & low pass filters, and De-esser. Remote monitoring and Ethernet control is easily enabled using an interactive software interface that offers options such as Quick Save, Preset Menu and Security Lock. Operator control is also possible using an embedded front panel display, which can be updated via USB connected mouse or touch sensitive track pad.

For more information regarding the Vorsis™ AP-1000 plus the new HD-P3 Signal Processor and M-1 Microphone Processor visit: www.vorsis.com

About Wheatstone

WHEATSTONE CORPORATION is the leading supplier of digital control surfaces, digital audio networks, and AOIP automation audio and control interfaces for the broadcast industry. Located in New Bern, North Carolina, USA, Wheatstone Corporation designs and manufactures professional broadcast audio equipment under the WHEATSTONE, AUDIOARTS ENGINEERING, and VORSIS™ brand names.
