

AUDIOARTSNET ROUTER

High Speed Network Central Switch Connects Studios and Operation Center

- Secure 64-channel bi-directional data paths with embedded control
- Eight network ports for up to eight studio locations
- Unrestricted backplane data path
- No external PC required for continuous operation (source naming only)
- Centralizes shared resources and wiring in your TOC
- Only one CAT5 wire to each studio
- Seamless integration with D-75 consoles
- 44.1 kHz, 48 kHz or external sync operation
- Super quick installation
- Easy expansion

THE AUDIOARTS NET-8 has eight CAT-5 network ports for audio I/O or console interface, yet it only takes up one rack space.
