For Immediate Release

WHEATSTONE ANNOUNCES NAB RADIO 2001 EXHIBITION PLANS

New Bern, NC (July 20, 2001) -- Wheatstone Corporation, the leading supplier of broadcast audio mixing consoles, will exhibit a full complement of professional audio equipment and studio furniture from the WHEATSTONE, AUDIOARTS ENGINEERING and AUDITRONICS product lines at the NAB Radio Show (Booth # 1118) in New Orleans on September 5-7.

WHEATSTONE PRODUCTS ON EXHIBIT WILL INCLUDE:

- **Wheatstone D-700 Digital Audio Console** - Full featured, top-of-the-line radio on-air console with built in router interface, alpha source displays, DSP channel functions, 99 snapshot presets for individually configured daily or seasonal events. Much, much more.
- **Wheatstone D-5000 Digital Audio Console** - Totally modular, hot-swap design with traditional user interface. Inputs can be field-converted from analog to digital. Dedicated phone module, alpha source displays, computerized set-up and configuration.
- **Wheatstone A-2000 Linear Audio Console** - Streamlined, compact, versatile - this affordable Wheatstone console is ideal for multi-studio buildouts.
- **Wheatstone BRIDGE 2001 Digital Audio Network Router** - A powerful, practical, compact, cost-saving solution for growing studios with mixed audio standards. Features bi-directional fiberoptic or CAT-5 interlocation connectivity, all digital domain AES switching, analog or digital inputs and analog and digital outputs.

-more-

- **Wheatstone Wiremax Studio Interface System** - User-friendly studio interface modules designed to be mounted in studio wiring bays, eliminating the need for 66-type punchblocks and making connections between studio equipment and consoles an easy, plug-and-play process.
- **Preference, Eclipse and Techline studio furniture** - Series of studio furniture that offers budget and decor diversity through three design choices. All three incorporate the same rigid steel interior structural elements, differing only in exterior finish details.

AUDIOARTS PRODUCTS ON EXHIBIT WILL INCLUDE:

- **Audioarts R-60 Audio Console** - Totally modular on-air/production board with hot-plug modules, all LED illumination, rackmount power supply and comprehensive internal and external logic functions necessary for the broadcast environment.
- **Audioarts D-70 Digital Radio Console** - Compact tabletop design with both analog and digital inputs and outputs lets you upgrade to digital at your own pace. Four stereo busses, full-scale digital peak and VU ballistic metering, dual fader Superphone module and serial interface for automation system and router integration.
- **Audioarts RD-20 Digital Radio Console** - 100% modular design with hot-plug modules means virtually no downtime for maintenance and repairs. 24-bit technology with sample rate conversion, any combination of mic, analog and digital inputs, 3 stereo busses plus mix-minus (up to four callers), and comprehensive monitoring functions.
- **Audioarts R-17 Audio Console** - Cost effective, modular live radio console utilizes top grade components and circuits for excellent performance and superior sound quality. Perfect for smaller stations looking to upgrade—as well as larger facilities in need of an aux studio or newsroom console.

AUDITRONICS PRODUCTS ON EXHIBIT WILL INCLUDE:

- **Auditronics 2600 Series Audio Console** - Designed for the tightest of budgets, the 2600 Series combines elegant design elements with solid construction to deliver top-notch performance in a compact countertop unit.
- **Auditronics Model 220 Digital Audio Console** - Totally modular, cost-effective digital console features any combination of mic, analog line or AES digital inputs; four stereo busses, serial interface, dual caller control and separate control room and studio outputs.

-more-

- **Auditronics ALM-12d Digital Audio Console** - Route any input to any fader; combines the functions of a router and an on-air audio console into one compact, highly cost-effective package. Tabletop mount with easy direct-access I/O connections.

WHEATSTONE CORPORATION is located in New Bern, North Carolina, USA. Wheatstone Corporation designs and manufactures professional broadcast audio equipment under the WHEATSTONE, AUDIOARTS ENGINEERING and AUDITRONICS brand names. The company also markets a digital audio network router and several lines of studio furniture, as well as a unique studio interface wiring system.
